Project Two Ideas

Pick Five Model Types	count	First Choices	
Partial Least Square Regression	4		*
Support Vector Machine - Regression	5	Bethany	*
Cubist Regression Tree	3		*
Multivariate Adaptive Regressions Splines	4	Juliann	*
Boosted Regression Tree	2	Jeremy	*
K-nearest Neighbor Regression	2		*
Bagged Regression Tree	1	Andy	*
ElasticNet Regression	1		
Linear Regression	1	Vinicio	*
Random Forest	1		
Neural Network	1		

Our New Seed : 58677

So we have 11 chosen models altogether...we have two options 1. vote to purge one of the ones with one vote other than Linear Regression
2. One of us does three insead of two.

As for me, my thought is purge Random Forest as we are bagging, boosting, cubing already!

What do you guys think?
